Exercise 1 - Main Window Operations

- Execute edm

- Select *Path* from main window
    - The resulting menu contains the name of directories accessible by edm
    - Clicking on a menu entry sets default location for *open*/*save*/*save as* operations

- Create a new window
    - Select *File --> New* from the main window menu bar
    - Middle-button-click on the new window background and select display properties to bring up the window property box. Set the title to *One.*
    - Click *OK* to save changes
    - Save as /home/student#/exercises/one.edl (middle button click - use *Path* menu)
    - Close window (middle button click or title bar x icon)

- Open /home/student#/examples/example1.edl (use *Path* menu)
    - Select *File --> Open* from the main window menu bar
    - Save as /home/student#/moreExamples/example2.edl (use *Path* menu)
    - Close window (middle button click or title bar x icon)

- Select *View* from main window, then select *PV List*
    - Enter **pvDemo.list** into the *File* text entry box and press **Enter**
    - Enter the following into the *Filter* text entry box
        - **stat*** (show pvs starting with *stat*)
        - ***Control** (show pvs ending with *Control*)
        - **One** (show pvs containing *One*)
    - Enter **$(db):** into the *Prefix* text entry box and press **Enter**
        - Click on the pv names and examine the bottom-most text box
        - The contents of the bottom-most text box is placed in the paste buffer and may be pasted into a form by clicking the middle mouse button
        - Dismiss PV List window

- Select *Help* from main window, then select *On-line*
    - Browse help topics
